

## ENPOINTE Permissions-based email Authorization

Before importing your email distribution list into our email distribution application, the CAN-SPAM Act of 2003 requires that you verify the list you are submitting contains only email addresses from individuals who have given you express permission to send them email. Such email addresses are also referred to as "opt-in" addresses, giving you and your agents permission to send them email.

By checking the "I agree" box below, you verify that this email distribution list qualifies as an "opt-in" list because all members of this list expressly provided direct consent or otherwise gave you, your company, and your agents express permission to send email messages to them.
